

## IN THE SPECIFICATION

Please correct the paragraph that begins on page 7, line 18 as follows:

--Figure 4 illustrates the guard 34 mounted to the frame member 64 62. The frame member 64 62 includes a mounting pin 68 carried by a neck 70. The pin 68 and neck 70 can be formed unitary with the remaining portions of the frame member 64 62. According to the preferred embodiment, the frame member 64 62 is a single, ductile iron piece.--
